## Instructions for mast installation (ref. Lufft 8357.450)

## **Description:**

The mast is hot-dip galvanized fold-over mast. It allows an easier installation of the sensors on the top of it. Its height is 4,5 meter.

It is meant to be fixed to a concrete base. To avoid any surge of the system, the mast and mast foot will need to be properly grounded

## **Foundation:**

The foundation needs the dimensions:

Length x width x height: 1 m x 1 m x 1 m

Concrete type: C 25/30

Reinforcement: bar 5 Ø 16 crosswise

The anchors can also be used on precast foundations without problem.
